

RA-5010

Semi-auto Chemistry Analyzer

**The Universal
Chemistry
Workstation**
Flexible and Powerful

**Performing any kind of
Photometric test**

- Clinical Chemistry
- Specific Drugs
- Therapeutic Drugs
- Electrolytes
- Drugs of Abuse

Features

- Easy Windows operation system with mouse, large color LCD display.
- Reagent-open system supports both flow cell and cuvette mode, close system on request.
- Analytical modes include kinetic, two point, bichromatic end point with or without reagent blank or sample blank, linear or non-linear calibration curves.
- Real-time curve monitoring enhances the reliability of result.
- Large memory to store 160 test protocols.
- Powerful QC function: Westguard, Levey jennings plot, 2 controls per test.
- Auto power-on self-check feature.
- Additional lamp saving feature.
- Multiform result output including patient comprehensive report.
- Ability to communicate with PC for data management.(optional)
- Easy maintenance design, no service engineers required to change lamp, tube etc.
